Agenda

- Aim of PaSQ
- Why is the project important?
- Deliverables
- Results
- Lessons learned

Funded by
the Health Programme
of the European Union

European Union Network for
Patient Safety and Quality of Care

Aim of PaSQ:

To **contribute** to **Patient Safety (PS)** and good **Quality of Care (QC)** by supporting the implementation of the Council Recom. on PS through **cooperation** between MSs, EU stakeholders and international org. on issues related to quality of health care and PS.

This will be done by **sharing knowledge, experience and good practices.**

Aim PaSQ

- To establish transferable Safe Clinical Practices in Patient Safety
- To share Safe Clinical Practices through an interactive web tool
- To build a mechanism to share these Safe Clinical Practices involving Member States (MS) and relevant stakeholders

Level: Clinical level

Target group: Health care professionals

Focus: Patient safety

Funded by
the Health Programme
of the European Union

European Union Network for
Patient Safety and Quality of Care

Agenda:

Aim of WP 4

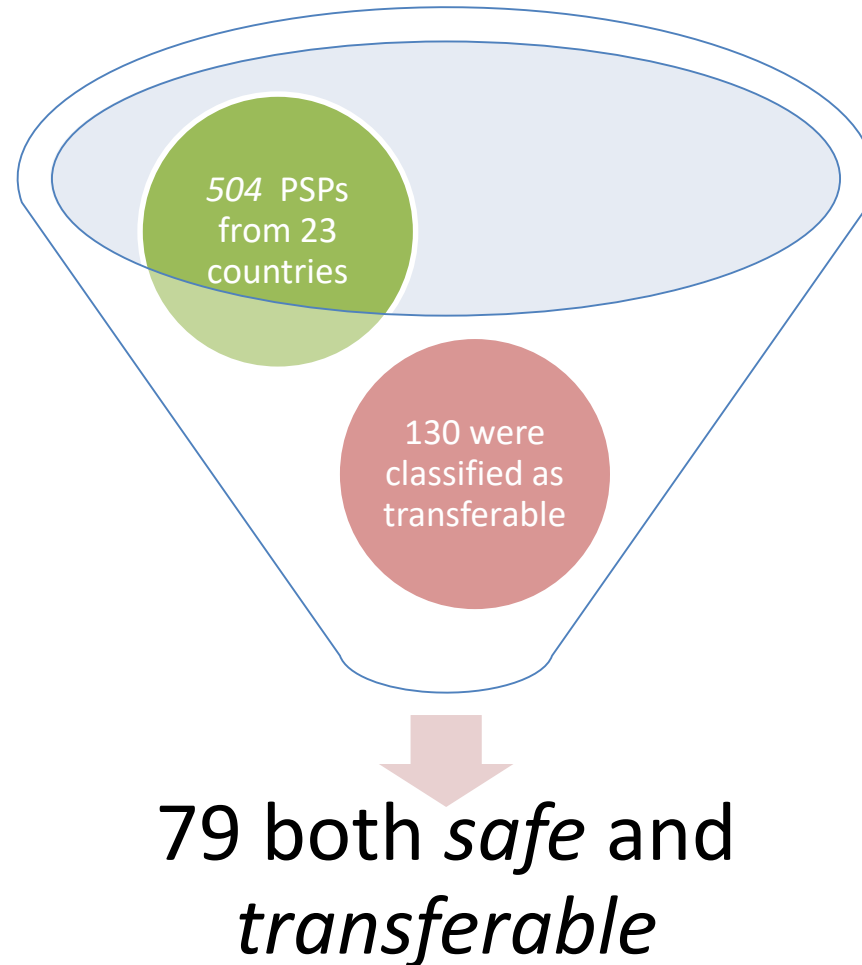

Why is the project
important?

Deliverables

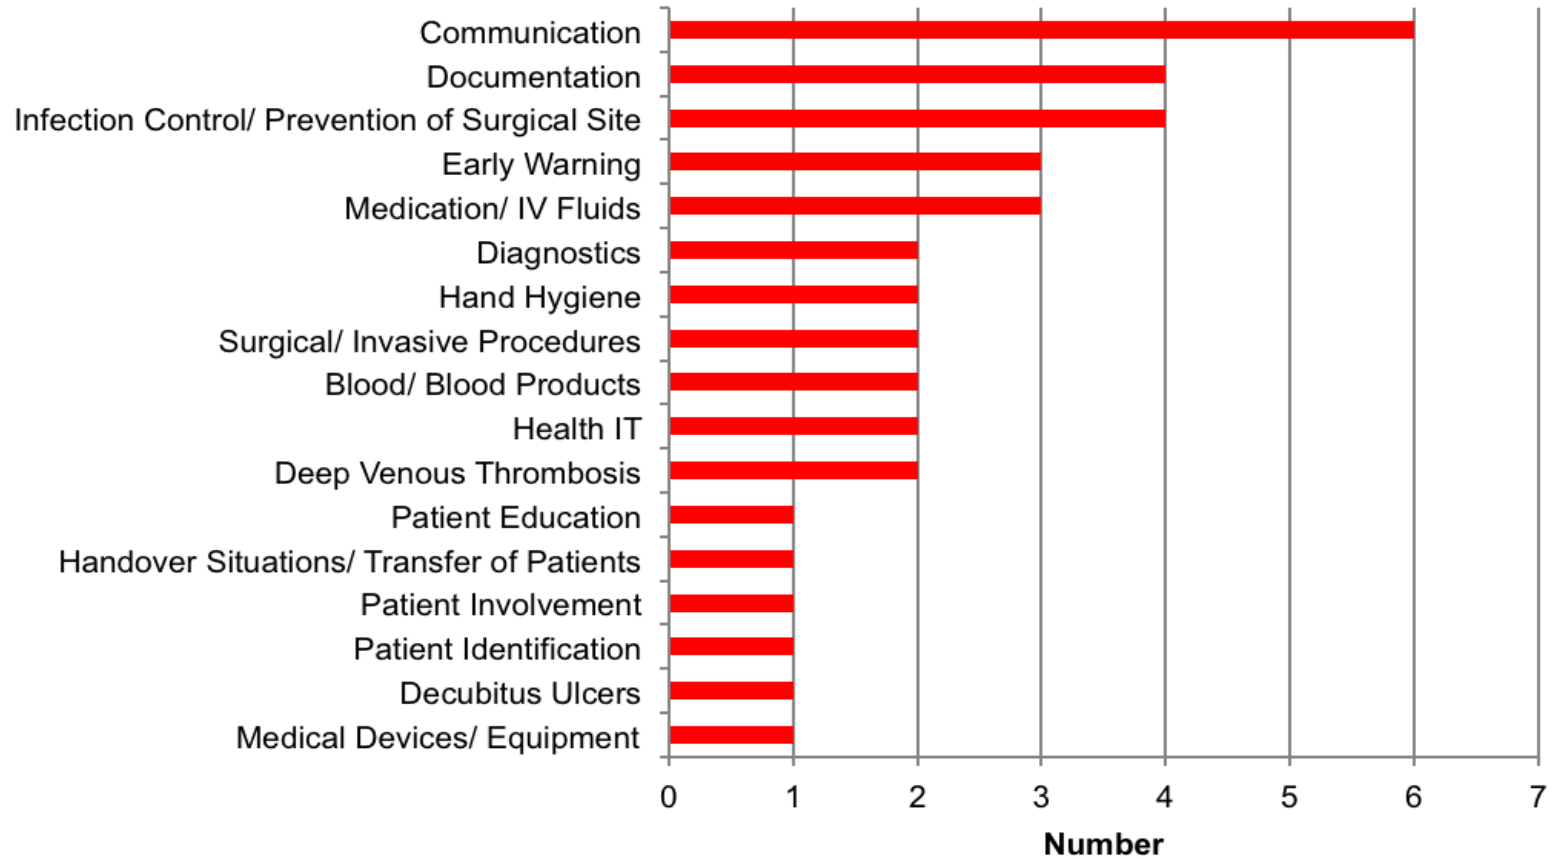

Results

Lessons learned

Lessons learned

- PaSQ has had a positive impact on the european coordination and collaboration on patient safety and quality of care
- Collecting patient safety practices was a succes in order to obtain knowledge about PS and QoC
- EMs is a key method to mutual learning, knowledge sharing and exchange of ideas
- NCPs and national networks are cornerstones in communication and reaching health care professionels

Funded by
the Health Programme
of the European Union

What is the current status?

- Website is still running
- Use it while its there
- The commission is a bit
- Use the informal network
- Join the global agenda, WHO, Global Ministerial Summit on Patient Safety
- → WHO agenda e.g. medication without harm

Thank you...
