

# The digital COVID certificate

Published: 07.06.2021.

On 1 June 2021, the digital Covid-19 certificate website [www.covid19sertifikats.lv](http://www.covid19sertifikats.lv) was launched in the Republic of Latvia, providing people with access to their digital Covid-19 certificates. The certificate is proof that a person is vaccinated against Covid-19, is tested for Covid-19 or has recovered from Covid-19. Currently, the following types of the Digital COVID Certificate are available:

Certificate of vaccination against COVID-19.

Certificate of the results of COVID-19 laboratory analysis.

Certificate of the fact of having been previously infected with COVID-19.

To view your Digital COVID Certificate, you have to:

Click the button "View my certificates" on the website [www.covid19sertifikats.lv](http://www.covid19sertifikats.lv)

Authenticate with any of the means of secure access (Internet banking, eID Card, mobile ID).

Request your certificates in the system and then you can view or save them (on a computer, smart device).

Types of certificates and their use

Validity of the vaccination certificate

Questions and answers

Receiving a digital certificate if the resident does not use the Internet

Creation of a certificate if vaccination was performed outside European countries

Short-term vaccination certificate

Mobile application for scanning "COVID-19 Verify" certificates
